610-426-2544

What is Dysphagia?

Dysphagia is a swallowing disorder, which can result from a CVA, Parkinson's disease, MS, Head and Neck Cancer, TBI, and other conditions.

How Can VitalStim® Plus Help?

- VitalStim® Plus is a **pain-free** neuromuscular electrical stimulation (NMES) device, which was developed to **recruit and re-educate** the muscles of the **swallow**.
- VitalStim® Plus offers **sEMG Biofeedback** unlike traditional VitalStim®. sEMG Biofeedback increases patient effort and participation, and provides the data and documentation required to **measure patient outcomes** and **quantify progress**.
